### REASONS FOR ALLOWANCE

1. The following is an examiner's statement for reasons for allowance: Yamaguchi et al. in Japan Patent No. 2003-136,248 discloses a thermal cutting machine with exhaust chambers. DE 299 16 400 discloses a support table for workpiece that are thermally processed with an integrated suction system. Lai in U.S. Patent No. 6,881,924 discloses an air collecting bin in a laser-cutting/engraving machine. Regarding claims 1-9, none of the references disclose or suggest, alone or in combination a laser assembly comprising at least one clamp operatively associated between the frame and the removable work table having a clamping position for clamping the work table to the frame with the work surface in the work surface plane and a release position for removing the work table from the frame. Regarding claims 10-15 none of the references disclose or suggest, alone or in combination a laser assembly comprising a removable work table having a planar work surface, an X-Y beam transport operatively associated with the frame, and a void underlying the removable table, the void being operatively associated with the X-Y beam transport with the removable work surface removed. Regarding claims 16-27, none of the references disclose or suggest, alone or in combination a laser assembly comprising a redirectable exhaust having an exhaust inlet operatively associated with the work table for transitioning exhausting above or below the work surface as the work table is moved from the distal position to the proximal position along the Z axis. Regarding claims 28-30, none of the references disclose or suggest, alone or in combination a method of exhausting fumes from a laser assembly comprising: automatically selectively
